1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joe Mehrle on 5-3-05.

Claim 14 was changed to read as follows:

14. (Currently Amended) A cockpit instrument system, comprising: a first display having a first region displaying settings and one or more second regions displaying first additional settings and additional flight data;

a second display having a first region displaying the settings and having one or more second regions displaying second additional settings and the additional flight data,

and wherein the first and second displays immediately adjacent to one another; and wherein the first additional settings and the second additional settings are the same;

a first bezel encompassing the first display and having one or more controls affixed to the first bezel; and a second bezel encompassing the second display and having one or more controls affixed to the second bezel;

wherein the controls are manually adjusted to modify the settings and displayed flight data.

Claim 15 was cancelled.

Claim 21 was amended to read as follows:

21. (Currently Amended) A method of presenting flight setting data on a flight display, comprising:
- providing a flight display interfaced to flight controls and flight sensors, and wherein the flight controls include a transponder control;
 - receiving flight setting data from the flight sensors by manually adjusting the flight controls; and
 - presenting the flight setting data in a contiguous location within the flight display with one or more additional locations within the display available for additional use;
 - wherein in providing the flight display, a bezel encompasses the flight display having the flight controls affixed to a front side of the bezel, and a rear side of the display and the bezel include the flight sensors.

Claim 22 was cancelled.

2. The following is an examiner's statement of reasons for allowance: the prior art does not adequately disclose a cockpit instrument system having first and second immediately adjacent displays with a first region for settings and a second region for additional settings and flight data, first and second bezels encompassing the first and second displays having flight controls affixed for manually adjusting the settings and displayed flight data, the bezels being rims that hold a transparent covering .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
